Unauthorized Activity within Inland Wetlands & Watercourses, Restoration required by 11-1-23.

No discussion.

52 Gurley Road: Notice of Noncompliance -Unauthorized Grading & Clearing of Stream Channel

The Commission reviewed the notice of noncompliance and photographs of the stream channel. Activity conducted without authorization involves clearing vegetation and grading along a portion of the stream channel. Staff is working with the property owner on a stabilization and restoration plan. The stream is down gradient of the 21 Gurley Road development and extends through the 52 Gurley Road property and is generally bordered by maintained lawn. To stabilize the channel, the owner may need to place some rip-rap and revegetate the channel banks.

It was the consensus of the Commission to have staff continue to coordinate with the owner.

6. OTHER BUSINESS

Staff presented a request from the owner of 167 Niantic River Road to install a pool enclosure fence along and partly within a designated conservation easement area boundary on the property. The Commission reviewed photographs of the boundary area where large boulders had been placed. The request is to construct a chain link fence outside of the boulder wall, which in places would occur slightly within the easement area. Staff stated the Commission may authorize the fence within the conservation easement area per the provisions of the easement agreement.

Motion: Made by M. Keatley and seconded by T. Maidelis to find that the installation of the enclosure fence as requested does not involve activity detrimental to water quality, soil conservation, slope stability or wildlife and to approve the proposed fence.
